The Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Panel 9671 represents the flood risk in Henderson County, North Carolina. The map provides information on floodway boundaries, flood risk zones, and flood elevations.

**Floodway Boundary:** The blue lines indicate the floodway boundaries. These areas are subject to flooding during a 1% annual chance flood event.

**Flood Risk Zones:**
- **ZONE A:** Areas with a 1% annual chance of flooding.
- **ZONE AE:** Areas with a 1% annual chance of flooding outside the floodway.
- **ZONE AR:** Areas with a former flood control system that was subsequently decertified.
- **ZONE X:** Areas not subject to flooding fromdsources.

**Flood Elevations:**
- Flood elevations of 1 to 3 feet (usually sheet flow on sloping terrain). These elevations may have been adjusted to reflect modern construction standards.

**Data Sources:**
- Information for this map was obtained from the North Carolina Geodetic Survey at the address shown below. The data is also available at http://www.ngs.noaa.gov.

**Conversion of Elevations:**
- Flood elevations must be compared to structure and foundation elevations.
- Flood elevations have been determined and users are encouraged to consult the Flood Profiles, Floodway Data, Limited Detailed Flood Hazard Data, and/or Summary of Stillwater Elevations tables in the Flood Insurance Study report to obtain further information on the conversion of elevations between NGVD 29 and NAVD 88.

**Questions:** For questions about the data, please call 1-800-358-9616. Additional information on the flood control structures in this jurisdiction is available from the North Carolina Division of Emergency Management or the National Flood Insurance Program at the following phone numbers or websites:
- 1-800-358-9616
- http://www.fema.gov
- http://www.firmmaps.gov

**Summary:** The FIRM Panel 9671 provides critical information for flood insurance purposes and helps inform flood risk management decisions.
