

A petition from the 191 Alliance to the Henderson County Commissioners, and French Broad River Metropolitan Planning Organization

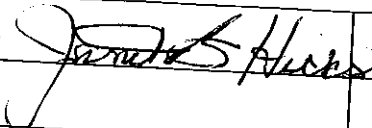

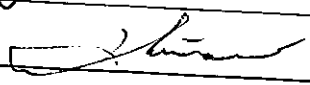

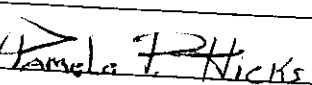

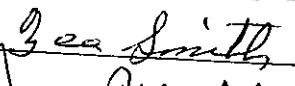

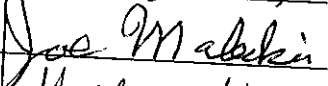

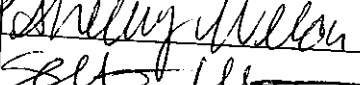

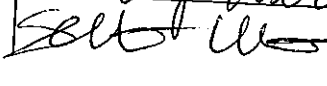

Reassess and Revise the 191 Four-lane Expansion Project (NCDOT R-2588B)

We, the undersigned, oppose NCDOT's current plan to widen NC-191 to four median-divided lanes between Boylston Hwy and Mountain Road and call on NCDOT to propose a new improvement plan.

Since the Balfour project has been cancelled, we maintain that the data used to determine the widening of NC-191 no longer applies and was inaccurately interpreted from the beginning.

We petition the aforementioned government entities to completely redesign the current NCDOT R-2588B project in order to reflect the more accurate traffic volume and accident statistics, and that the redesign be approved by residential vote from the following voting precincts: Long John Mountain, Rugby, South Mills River, North Mills River, and Northwest. Instead of a 4-lane highway with a median, we ask that the project be revised to widen the current lanes and install a center turn/medium lane.

Reassess and Revise the 191 Four-lane Expansion Project (NCDOT R-2588B)

We, the undersigned, oppose NCDOT's current plan to widen NC-191 to four median-divided lanes between Boylston Hwy and Mountain Road and call on NCDOT to propose a new improvement plan.

Since the Balfour project has been cancelled, we maintain that the data used to determine the widening of NC-191 no longer applies and was inaccurately interpreted from the beginning.

We petition the aforementioned government entities to completely redesign the current NCDOT R-2588B project in order to reflect the more accurate traffic volume and accident statistics, and that the redesign be approved by residential vote from the following voting precincts: Long John Mountain, Rugby, South Mills River, North Mills River, and Northwest. Instead of a 4-lane highway with a median, we ask that the project be revised to widen the current lanes and install a center turn/median lane.

We, the undersigned, oppose NCDOT's current plan to widen NC-191 to four median-divided lanes between Boylston Hwy and Mountain Road and call on NCDOT to propose a new improvement plan.

Since the Balfour project has been cancelled, we maintain that the data used to determine the widening of NC-191 no longer applies and was inaccurately interpreted from the beginning.

We petition the aforementioned government entities to completely redesign the current NCDOT R-2588B project in order to reflect the more accurate traffic volume and accident statistics, and that the redesign be approved by residential vote from the following voting precincts: Long John Mountain, Rugby, South Mills River, North Mills River, and Northwest. Instead of a 4-lane highway with a median, we ask that the project be revised to widen the current lanes and install a center turn/median lane.

Reassess and Revise the 191 Four-lane Expansion Project (NCDOT R-2588B)

We, the undersigned, oppose NCDOT's current plan to widen NC-191 to four median-divided lanes between Boylston Hwy and Mountain Road and call on NCDOT to propose a new improvement plan.

Since the Balfour project has been cancelled, we maintain that the data used to determine the widening of NC-191 no longer applies and was inaccurately interpreted from the beginning.

We petition the aforementioned government entities to completely redesign the current NCDOT R-2588B project in order to reflect the more accurate traffic volume and accident statistics, and that the redesign be approved by residential vote from the following voting precincts: Long John Mountain, Rugby, South Mills River, North Mills River, and Northwest. Instead of a 4-lane highway with a median, we ask that the project be revised to widen the current lanes and install a center turn/median lane.

Reassess and Revise the 191 Four-lane Expansion Project (NCDOT R-2588B)

We, the undersigned, oppose NCDOT's current plan to widen NC-191 to four median-divided lanes between Boylston Hwy and Mountain Road and call on NCDOT to propose a new improvement plan.

Since the Balfour project has been cancelled, we maintain that the data used to determine the widening of NC-191 no longer applies and was inaccurately interpreted from the beginning.

We petition the aforementioned government entities to completely redesign the current NCDOT R-2588B project in order to reflect the more accurate traffic volume and accident statistics, and that the redesign be approved by residential vote from the following voting precincts: Long John Mountain, Rugby, South Mills River, North Mills River, and Northwest. Instead of a 4-lane highway with a median, we ask that the project be revised to widen the current lanes and install a center turn/median lane.

Since the Balfour project has been cancelled, we maintain that the data used to determine the widening of NC-191 no longer applies and was inaccurately interpreted from the beginning.

We petition the aforementioned government entities to completely redesign the current NCDOT R-2588B project in order to reflect the more accurate traffic volume and accident statistics, and that the redesign be approved by residential vote from the following voting precincts: Long John Mountain, Rugby, South Mills River, North Mills River, and Northwest. Instead of a 4-lane highway with a median, we ask that the project be revised to widen the current lanes and install a center turn/median lane.

Reassess and Revise the 191 Four-lane Expansion Project (NCDOT R-2588B)

We, the undersigned, oppose NCDOT's current plan to widen NC-191 to four median-divided lanes between Boylston Hwy and Mountain Road and call on NCDOT to propose a new improvement plan.

Since the Balfour project has been cancelled, we maintain that the data used to determine the widening of NC-191 no longer applies and was inaccurately interpreted from the beginning.

We petition the aforementioned government entities to completely redesign the current NCDOT R-2588B project in order to reflect the more accurate traffic volume and accident statistics, and that the redesign be approved by residential vote from the following voting precincts: Long John Mountain, Rugby, South Mills River, North Mills River, and Northwest. Instead of a 4-lane highway with a median, we ask that the project be revised to widen the current lanes and install a center turn/median lane.
