A petition to the Henderson County Commissioners, and
 French Broad River Metropolitan Planning Organization

Reassess and Revise the 191 Four-lane Expansion Project (NCDOT R-2588B)

We, the undersigned, oppose NCDOT's current plan to widen NC-191 to four median-divided lanes between Boylston Hwy and Mountain Road and call on NCDOT to propose a new improvement plan.

Since the Balfour project has been cancelled, we maintain that the data used to determine the widening of NC-191 no longer applies and was inaccurately interpreted from the beginning.

We petition the aforementioned government entities to completely redesign the current NCDOT R-2588B project in order to reflect the more accurate traffic volume and accident statistics, and that the redesign be approved by residential vote from the following voting precincts: Long John Mountain, Rugby, South Mills River, North Mills River, and Northwest. Instead of a 4-lane highway with a median, we ask that the project be revised to widen the current lanes and install a center turn/median lane.

**Revise the 191 Four-lane Expansion Project
(NCDOT R-2588B)**

I oppose NCDOT's current plan to widen NC-191 to create a four-lane highway with a raised grassy median in the corridor between Mills River and Mountain Road and I call on NCDOT to propose a new improvement plan.

I petition the Henderson County Board of Commissioners to redesign the current NCDOT R-2588B project in order to reflect the current traffic volume forecast and accident statistics. Instead of a 4-lane highway with a median, I ask that the project be revised to install a center turn/median lane if additional width is needed.

The middle of the new design should be the same as the middle of the existing highway so that the new design will fit within the current 100-foot Right-of-Way and no additional privately held property needs to be acquired.

**Listen to
the public...
Redesign 191**

Traffic only backs up on 191 when school starts and when it lets out. Lengthen the turn lanes to the schools (West + Rugby) Middle), so people dropping off/picking up kids can clear the traffic lanes.

Also, when Hwy 26 is widened, it will reduce traffic on 25 and 191.

Current plans will require Haywood Knolls (321 Homes) traffic going west on 191 or North on Rugby to take back exit Arbor Lane to Rugby Rd. Dangerous Rugby Road curve blinded by plant ~~growth~~ ^{growth}.

Arbor is in need of improvement also.
James Wilke 440 Fawnview Ln, Hendersonville
