PART 2: LHD Completeness Review of the Notice of Intent to Construct

"(c) Completeness Review for Notice of Intent to Construct. — The local health department shall determine whether a notice of intent to construct, as required pursuant subsection (b) of this section, is complete within 15 business days after the local health department receives the notice of intent to construct. A determination of completeness means that the notice of intent to construct includes all of the required components. If the local health department determines that the notice of intent to construct is incomplete, the department shall notify the owner or the professional engineer of the components needed to complete the notice. The owner or professional engineer may submit additional information to the department to cure the deficiencies in the notice. The local health department shall make a final determination as to whether the notice of intent to construct is complete within 10 business days after the department receives the additional information from the owner or professional engineer. If the department fails to act within any time period set out in this subsection, the owner or professional engineer may treat the failure to act as a determination of completeness."

to ac	t as a determination of completeness."

STATE OF NC ENGINEERED OPTION PERMIT APPENDIX A: INSTRUCTIONS FOR USE OF THE COMMON FORM

GENERAL INFORMATION

This State form is required for submittal of documentation of an Engineered Option Permit (EOP) pursuant to NC General Statute 130A-336.1.

Three separate actions are addressed in this single form:

- 1. Notice of Intent to Construct (NOI)
- 2. Local Health Department (LHD) Completeness Review of the NOI
- 3. Authorization to Operate (ATO)

G.S. 130A-336.1 states that:

"The Department, the Department's authorized agents or local health departments shall have no liability for wastewater systems designed, constructed and installed pursuant to an Engineered Option Permit."

The registered professional engineer (PE) is fully responsible for the siting, design, construction of the system as well as for development of an appropriate management plan. Thus, the LHD shall not conduct a qualitative review of submitted information but will simply document that the PE or Owner attests that the information required by Statute and Rule has been provided. The directions provided here describe the steps in using this State approved common form.

PART 1: Notice of Intent to Construct (NOI)

The LHD enters the date that the NOI is received. The PE completes the remainder of this part of the form through item 17 and attests to the integrity of the submitted information. The form may be submitted to the LHD by either the Owner or the PE, provided the PE is designated by the Owner as their legal representative.

Attestation by Registered Professional Engineer

The PE signs and dates this section to attest that the information provided on the form meets the requirements of 130A-336.1 and 15A NCAC 18A .1971.

The LHD verifies that the PE signed and dated this section.

Designation of PE as Owner's Representative

If the Owner wishes, they may designate the PE to act as their legal representative for purposes of the EOP. The Owner may use this part of the form for the purpose of designation. Other means of such designation are acceptable provided that the documentation clearly indicates the same information shown in this section and the Owner signs and dates the documentation.

PART 2: LHD Completeness Review of the Notice of Intent

This section is designed for the LHD to document receipt of the required items. The LHD has no liability for the site evaluation, design plans and specifications and the construction of the system. Thus, the completeness review is based upon information that the PE provides and attests to, not on the basis of any other review of the submittal.

Items 1 through 5: The LHD verifies that the PE provided contact information for the Owner as well as for all professionals who will participate in the design, permitting, installation and inspection process.

Item 6 through 17: LHD verifies that the PE attested to the following on the NOI:

- 6. Proof of Insurance is attached for each professional that includes the name of the insurer, the name of the insured individual and the effective dates of coverage. (Note that, at a minimum, the PE must check boxes for "PE", "LSS" and "Onsite Wastewater Contractor" and attach Proof of Insurance attached in accordance with G.S. 130A-336.1(b)(3).
- 7. The PE identified a physical location of the property. If a 911 address is not yet assigned, other identifying information must be provided such as a PIN or Subdivision name/Phase or Section/Lot number.
- 8. The PE provided a facility description (e.g., "Single family residence", "Office space" or "Dog kennel"). The PE shall describe any factors that "would affect the wastewater load" on the form.
- 9. The PE designated a System Type (per Rule.1961) and rough system location ("Right rear of property as viewed from the road" or similar).
- 10. The PE stated the projected wastewater flow and indicated the projected wastewater strength. (Duplicate plans for EOPs addressing flows greater than 3,000 gpd or industrial process wastewater (IPWW) are required to be sent to the state by the PE.)
- 11. The PE stated that a Plat as defined in 130A-334 (7a) is included in the submittal.
- 12. The PE stated that the Owner owns or controls the property on which the system is located as required by 15A NCAC 18A .1938(j).
- 13. If the PE indicated that easements or encroachment agreements are required, the PE also lists the County, Deed book and Page number where they are recorded.*
- 14. If the PE indicated that multi-party agreements are required, the PE also lists the County, Deed book and Page number where they are recorded.*
- 15. The PE stated that any proposed setbacks to all water supplies and appurtenances are compliant with 15A NCAC 18A .1950.
- 16. The PE stated that a soils and site evaluation signed and sealed by either a Licensed Soil Scientist or a Licensed Geologist (as applicable) is attached.
- 17. The PE stated whether or not plans for proposed landscape, site, drainage or soil modifications are included. *These must be addressed prior to submittal of the NOI so that Owner can apply for building permits once the NOI is determined to be complete.

Documentation of results of LHD Completeness Review of the NOI

- The LHD verifies that the PE signed and dated this section to attest to the integrity of the information.
- If the PE is acting on the owner's behalf for ANY part of this process, the LHD verifies that the Owner signed the section for designation of the PE as their legal representative.
- If the information provided by the PE on the NOI form is *incomplete*, the LHD checks the box and enters the item number(s) in the space provided. If the information provided by the PE indicates that no items are missing, enter "None".
- The LHD checks the box to indicate notification was sent to the Owner and PE of items necessary to complete the NOI. The LHD indicates the date notification was conveyed and the means of conveyance.
- If the NOI is deemed complete, the authorized agent prints their name, signs and dates the form.
- A copy of the form is sent to the Owner and PE. The LHD retains the original document.
- The LHD shall note the date a copy of the final NOI is sent to the Department.

The LHD must complete this review and respond to the PE and Owner within 15 days of receipt of the initial submittal or within 10 days of submittal of missing information. If the LHD fails to respond, the owner or PE may treat the failure to act as a determination of completeness.

If needed, the LHD uses the area provided to document a 'follow up' review when missing items are submitted.

PART 3: Authorization to Operate (ATO)

When construction of the system is complete, the owner (or the PE, if designated as the Owners legal representative) shall submit documentation to the LHD as required in 130A-336.1(I) and as further specified in 130A-336.1(k) and 15A NCAC 18A .1938(h).

- The LHD enters the date the information was received.
- The Owner or PE indicates on this form what information they have submitted to the LHD by indicating YES or NO next to each required item.
- The Owner or PE signs and dates this section to attest that the listed information is attached.
- The LHD verifies that the Owner or the PE signed this section attesting to the integrity of the information.

The LHD shall respond to the PE and Owner within 15 days of receipt this information.

- If the information provided by the Owner or PE is incomplete (as indicated on the form), the LHD checks the box and enters the item number(s) in the space provided.
- If the information indicates that no items are missing, enter "None".
- The LHD checks the box to indicate notification was sent to the Owner and PE of items necessary to complete the ATO. The LHD enters the date notification was conveyed and the means of conveyance.
- If the information is complete, the authorized agent prints and signs their name and dates the form.
- A copy of the form is sent to the Owner and PE. The LHD retains the original document.
- The LHD shall note the date a copy of the final NOI is sent to the Department.
