

**Addendum #1 Health Science Center Concrete Step Repairs**

**Contractor Laydown area (stored materials, vehicles & equipment not being actively used).**

---

**Parking for Concrete Truck, Dump Truck for concrete debris & Pumper for Concrete. Contractor must provide cones and traffic control 1 lane closure. 1 lane must stay open at all times. Contractor should make every effort to provide pedestrian pathway when transporting concrete debris down the sidewalk from the steps to the loading zone.**

Vehicle Parking for 1 Contractor Truck. Drawing show what appears to be 4" thick concrete. Contractor may park (1) pickup truck here, but he will be responsible to repair any concrete that cracks from using this for parking. He must also provide and use protective matting to protect the concrete and provide a barricaded pedestrian path on both sidewalks.
