

Welcome

Our goal for tonight

- Listen and learn what the Hickory Nut Gorge community envisions long term recovery to look like.
- Provide clear information that we have available while being sensitive to the community's recent experiences.

How will your input be used

- Collect public input (HNG Community Partners Group, public survey, public meetings).
- Assess and compile community input to inform an overall Hickory Nut Gorge plan for long term recovery.

Flood events

- A recovery plan can help avoid, reduce, or mitigate impacts from future events.
- It can also help the community become more resilient in the future

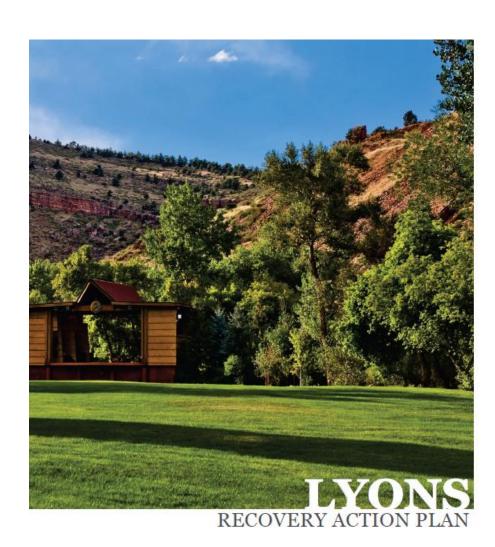

Lessons from other communities

Lyons & Estes Park, CO

- Both towns located in mountain river corridors that serve as gateways to recreational areas
- Lyons Recovery Action Plan became roadmap for longterm resilience planning and implementation

Lessons from 2013 Colorado Floods

Components of a Recovery Plan

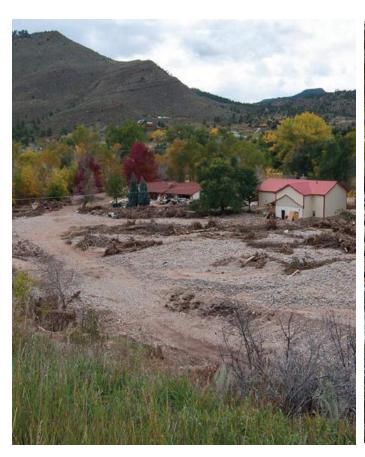

Background Milestones Guiding Principles	1 11 13
Planning Process How to Read this Plan	15 19
Arts, Culture & Historic Preservation Recovery Area	22
Economic & Business Recovery Area	28

Housing Recovery Area	50
Infrastructure Recovery Area	62
Parks & Recreation Recovery Area	70
Public Facilities Recovery Area	82
Stream Recovery Area	90
How to Use the Plan	101
Appendix	103
Lyon's Post-Flood Recovery Efforts	103
Implementation Table	104
Sustainable Futures Commission Recommendations	112

8 takeaways from the 2013 Colorado Floods

- 1. Create recovery goals that guide decisions for funding
- 2. Set realistic expectations for projects and celebrate small wins
- 3. Allow residents to shape recovery priority areas
- 4. Use every repair to make infrastructure stronger
- 5. Integrate environmental restoration and infrastructure in rebuilding
- 6. Treat housing, social services, and recreation as essential infrastructure
- 7. View recovery as a civic investment in the future
- 8. Monitor progress annually and adapt overtime

CREEK STABLIZED, DITCHES REPAIRED, and DEBRIS REMOVED

QUICK WINS: REGIONAL TRAIL REPAIRS

ABOUT 20 MILES OF REPAIRS!

Community helping each other. Planning for a better future.

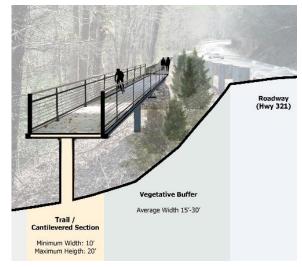

Repair and improved infrastructure.
Space for pedestrians & cyclists.
Creating economic
Opportunities.

Bank restoration, Mitigating erosion, Stormwater Management, & restoring habitats.

Recreation and River Access.

Now what?

- Get your Passport
- Attend a Listening Session
- Visit all 5 Stations

MEETING PASSPORT

BIG THOUGHTS FOR RECOVERY (upstairs) Tell us what recovery means to you! **ORIENTATION** (downstairs) Get to know the Hickory Nut Gorge Recovery study area with a general map and some statistics. INTERACTIVE MAPPING (downstairs) The overall map breaks the study area onto four (4) separate maps. We will have people to guide you through a mapping exercise where you can indicate what you want to see for recovery. SURVEY (downstairs) To help shape the outcomes of the recovery plan, please provide your input through our community survey. COMMENT BOX (downstairs) Share anything else you want us to know before you leave. Drop off your passport if you already took the survey - if not please take the passport home and use the QR code on the other side of this sheet to take the survey.
