

RECOMMENDATIONS

The following recommendations are proposed relative to the findings of this Study:

- Approve the Capital Improvement Plan as proposed in addition to the FY 2010 budget allocation for pre-construction/design fees for the initially proposed projects.
- Direct the County Staff and the Solid Waste Advisory Committee to work with the permitted haulers operating in the County to develop a plan to implement collection efficiencies and/or the franchising of residential waste and recyclable material throughout the unincorporated areas of the County.
- Continue discussion on establishing an equitable disposal fee for those citizens desiring to continue to handle their own residential waste and recyclables through the Stoney Mountain Road Citizens Convenience Center.
