Community Service Centers are appropriate for a mixture of commercial uses scaled to the service area in question; residential uses of varying densities depending upon available services; and Community Facilities such as schools, parks, community centers, and other similar Community Facilities. The mixture and intensity of land uses contained within Community Service Centers are intended to be appropriate within the context of the surrounding community and intended service area. Community Service Centers should also be properly controlled by appropriate aesthetic standards, access management standards, and other appropriate development control measures. (CCP, Pg. 138)
