5. Staff Comments

The 2020 CCP: The CCP Future Land Use Map places the Subject Area in the Community Service Center. The text and map of the 2020 CCP suggest that the Subject Area would be more suitable for the following:

Community Service Centers are intended to be intensive, efficient, defined concentrations of mixed services that meet the needs of the surrounding community and defined service areas. Community Service Centers are appropriate for a mixture of commercial uses scaled to the service area in question; residential uses of varying densities depending upon available services; and Community Facilities such as schools, parks, community centers, and other similar Community Facilities. The mixture and intensity of land uses contained within Community Service Centers are intended to be appropriate within the context of the surrounding community and intended service area. Community Service Centers should also be properly controlled by appropriate aesthetic standards, access management standards, and other appropriate development control measures.

6. Staff Recommendations

Staff's position at this time, under the guidelines of current plans, policies and studies, is to recommend approval of the major site plan because it is consistent with the current surrounding land uses and future land use recommendations.
